Kentucky Historical Society.
The Kentucky Historical Society, which was organized in 1879, with the names of the most prominent literary people, including the Governor and a number of ex-Governors at that time living, will probably be organized by an act of the present Legislature, says a special. The society lost its rights under the law by reason of non-compliance with law and failure to hold its sessions as provided for under the act of incorporation. The purpose of the society is to encourage the preservation of historical relics, and calling for papers on historical subjects to be preserved. The society already has a large display of relics and things of interest. Among the most valuable collections is the Collins library, owned and used by Historian Richard H. Collins during his lifetime, purchased by the State for something like \$1,000.

Throwing Boquets at Themselves.
Winchester Democrat: "Winchester has the name of being the most moral town in the State, and well deserves the title. An analysis of the recent religious census will give one reason. Out of the 2,700 names only about 360 of those old enough to join the church do not belong to any church, and less than half that number thought so little of the matter as to express no preference. This is a wonderful showing, and in the face of the fact that statistics show not more than twenty-five per cent. of the people belong to the church, it is a showing that is calculated to make us proud of our town."

"A minister who has been preaching for a third of a century or more told the pious recently that he had preached in many places but that more men attend church in Winchester than in any other city to his knowledge."

ELECTRIC TREATMENT.
Marvelous Scientific Discovery of Young Nicola Tesla—Wonderful Cures.

NEW YORK, Jan. 19.—Scientific men are greatly interested in the apparatus for the treatment of organic diseases invented by Nicola Tesla, the young genius of electricity. Few are skeptical, though many believe that Tesla may be too enthusiastic over his discovery. As a matter of fact, the young electrician makes no claim for his invention that it is a cure-all. He simply says that in many cases he has been able to improve the health of his friends, and that he will wait for some competent physician to give his invention a series of practical tests.

His theory is that the proper exercise for anybody is that which will reach the atoms, and give strength to every portion of the body. Physical exercise, such as walking or horseback riding, he believes to be of great benefit to the system, but for complete exercise each atom of the body should be reached. Acting upon this theory, he has made it possible to give to the system, by means of electricity, the much-needed exercise. He goes further, and declares that by varying his apparatus he can give special treatment to any portion of the body that may need strengthening.

When a person's ailment, for instance, is caused by torpidity of the liver, Mr. Tesla says, the physicians order the patient to take much and violent exercise, such as riding. Now, according to Mr. Tesla, if the person will just take a seat on his apparatus he will get in half a minute the equivalent of a whole day's riding. And, best of all, he will not be subjected to any jolting such as he gets on horseback, nor does he experience any of the fatigue incident to riding. But, notwithstanding the absence of these characteristics, the patient will have received as thorough a shaking up as if he had been trotting for dear life all day long.

The apparatus accomplishes this by means of tiny, but none the less powerful, electric shocks at the rate of 100 per second and distributed so evenly through the system that one scarcely perceives any alteration of his condition.

Unless Mr. Tesla's hopes are visionary—and there seems to be no reason why they should be considered so—persons who need exercise and have no time to take it need only to step up on the new apparatus and take a hundred-mile spin, so to speak, in a minute or two. Should anybody suffer from sleeplessness on account of lack of exercise, he can sit down, light a pipe and read a paper until he has taken the equivalent of a run around the track and then sleep as soundly as if he had actually performed that feat.

Being warned that their presence would not be acceptable at the church, a goodly number of the lady members assembled at the parsonage and passed the evening pleasantly in prayers, songs and Scriptural reading.

The public school for the Bracken end of the district will close next Friday. The academy will continue all the same. After this week Miss Gracie Pepper will retire from the corps of teachers. Her services have been highly acceptable to the patrons and children, and as we presume she is not different from other young ladies in that they are awaiting proposals, we can safely give her the best of recommendations.

Rev. Cook preached a discourse full of good practical sense to men exclusively on Sunday evening, but a church service without the smiles and voices of those who were last at the cross and first at the grave; those alone who make life worth living, the world endurable and heaven attractive is but an empty farce, a shell without the kernel, a tree without the fruit, a thorny bush from which the roses have been plucked, a bird without a song, a heaven without an angel.

On Thursday evening of last week some person or persons unknown painted Dr. Galt's gilt lettered sign a deep black utterly spoiling it.

The ensuing Friday evening the same parties, it is thought, abstracted the bolts from his buggy shafts and springs and substituted wooden pegs. The trickery was fortunately discovered before any damage had been done and what might have been a serious accident averted. Such actions deserve the condemnation of every good citizen.

The genial hosts exerted every effort to make it pleasant for their guests and as the good nights were said, "What a nice time I've had," was heard on every side.

Gained in Strength.

CADEZ, Ky., Dec. 31, 1895.—Two years ago I had the grip, which left me in poor health. Last summer I became so weak that I could hardly walk. My friends advised me to try Hood's Sarsaparilla and I procured a bottle. I began using it and gained in flesh and health and am better than for two years. N. T. SMULLEN.

For Sale.

One three seated covered platform spring wagon, for one or two horses. New set of wheels and a nice pleasant rider. Will sell cheap. W. H. HAWES, Minerva, Bus.

It is Known By Its Cures

It is not what we say, but what Hood's Sarsaparilla does, that tells the story of its merit.

The thousands of people whom it has raised from disease and despair to happiness and health, are the strongest and best advertisements Hood's Sarsaparilla has. No other preparation in existence has such a record of wonderful cures.

This is why Hood's Sarsaparilla has the largest sale, and requires for its production the largest laboratory in the world.

Now if you need a good medicine, why not try that which has done others so much good. Remember

I. O. O. F.

Special District Deputy Grand Master Thomas M. Luman last evening in DeKalb Lodge No. 12, installed W. R. Warder Vice Grand and Dr. J. H. Samuel his Right Supporter and Hal C. Curran his Left Supporter and Greeley Holliday Left Scene Supporter. The death of Hon. R. A. Cochran created a vacancy in the office of Treasurer and in the Real Estate Committee and the vacancies were filled by the election of Mayor William H. Cox to the office of Treasurer and Captain Thomas A. Davis a member of the Real Estate Committee. John C. Adamson, M. C. Russell and Thomas A. Keith were appointed a special committee to see about procuring a life-size photograph or a bust of the late R. A. Cochran to place in the lodge room in recognition of the high esteem in which the deceased Treasurer is held by the order. Next meeting night has heretofore been set apart for memorial services in honor of Mr. Cochran, and there will doubtless be a full attendance of the members.

Quarterly Court.

The Mason Quarterly Court seems to be competing with the Circuit Court in length of term and volume of business. The January term began on the 14th with nearly sixty new cases which, with some old cases, made a large docket. As the County Judge is both presiding Judge and Clerk of this court Judge M. C. Hutchins has been rushed with business, looking after the Quarterly Court and County Court and his private business.

About forty judgments have been rendered. Many of the suits have been stubbornly contested before the Judge and before juries. The large attendance of lawyers, litigants and witnesses, and the daily ringing of the court house bell gives the Quarterly Court quite a business like appearance.

THE C. and O. will sell round-trip tickets on the dates and to the territory named below at one fare plus \$4: To all points in Arkansas, Indian Territory, Oklahoma, Texas and Arizona; to points in Missouri, Tennessee, Mississippi and Louisiana except New Orleans. Will also sell round-trip tickets at one fare to all points in Virginia on the C. and O., Southern Railway, Atlantic Coast Line and Norfolk and Western. Tickets on sale January 14th and 28th, February 11th and March 10th, with thirty days limit.

THERE seems to be an unusual number of persons in the city and county sick with pneumonia, which has proved fatal in many cases. The doctors are busy, and the present weather will doubtless give them more patients. It is a good time to be cautious in exposure to the weather and especially guard against taking cold.

JAMES MANION and Miss Ellen Gantley, a popular young couple, will be married at the home of the bride in the Lewisburg precinct to-day.

THE Ladies Mite Society of the Christian Church will meet with Mrs. A. H. Thompson, East Third street, Thursday afternoon.

THE WEEKLY BULLETIN is the paper for the farmer. Subscribe now, if you are not already taking it.

I. O. R. M. will meet to-night. A full attendance is desired.

LOUISVILLE TOBACCO MARKET.

Decided Activity For New Tobacco and Prices Were Uniformly Better Last Week.

The following is furnished by Glover & Durrett, of the Louisville Tobacco Warehouse:

Sales on our market for the week just closed amount to 3,737 hds. with receipts for the same period 3,434 hds. Sales on our market since January 1st amount to 8,682 hds. Sales of the crop of 1895 on our market to this date amount to 11,974 hds.

The sales last week were composed of 2,540 hds. of new burley; 131 hds. of new dark tobacco; 310 hds. of old burley; 456 hds. of old dark tobacco. The market started off with decided animation and activity for new burley tobacco and prices have been uniformly better during the entire week than they were last week. The better grades of leaf have sold at figures ranging from \$12 to \$21.50 per hundred, and the medium grades have been taken at more satisfactory figures to sellers. One entire crop was sold during the week at an average above \$14 per hundred round. The market recently has shown a very noticeable improvement for old burley of grades that would class from low leaf medium up.

The following quotations fairly represent our market for burley tobacco, (1895) crop:
